# AI moves fast.
# Your company stays in control.

One company platform for approved
AI coding and agent work.

---

Enable employees.

Protect company data.

Stay accountable.

# The tools arrived. The control didn’t.

## Data

Where does company context go?

## Agents

What can they access and change?

## Spending

What are we paying for—and getting back?

# When AI can act, policy must act too.

ASSISTANTS SUGGEST

People review the answer.

AGENTS EXECUTE

They read context, call tools and run commands.

Company rules need to work where the action happens.

# One place to make AI ready for company work.

THE COMPANY CONFIGURES

Approved models, tools, context and rules.

THE EMPLOYEE LAUNCHES

A work environment that is ready to use.

# A ready-to-work AI environment. In one launch.

| Approved work profile | |
|---|---|
| Workspace | Models |
| Context & skills | Tools & permissions |

Publish once.
Assign by role.
Update centrally.

Less setup for employees.
Less integration work for IT.

# Keep company data on the approved path.

01 / CONTEXT

## Know what is being sent.

02 / CHECK

## Inspect before external dispatch.

03 / DESTINATION

## Use only approved services.

Allow, redact, block or request review—under company policy.

# Give agents a job. And clear limits.

LET WORK MOVE

Read the right repository.

Run the permitted tools.

Propose a change.

KEEP AUTHORITY EXPLICIT

Scope access.

Require sensitive-action approval.

Stop or revoke a run.

# Your models.
# Your infrastructure. Your choice.

## Local

Company-operated services.

## Cloud

Approved external providers.

## Hybrid

The right permitted path for the task.

One company experience across qualified integrations.

# Know what AI costs. See what it delivers.

## Faster starts

From approved access to useful work.

## Accountable spend

Usage, owners and run limits.

## Better decisions

Measure review, rework and verified outcomes.

# A subscription to the platform. Freedom to choose the services.

PROPOSED REVENUE MODEL

## Annual platform subscription + active employee usage

Customers bring their model providers and infrastructure.

Land with one workflow. Expand as the company rolls out AI.

# Prove one workflow.
# Then make rollout repeatable.

01

## Pilot

One engineering group.
One useful workflow.

02

## Validate

Employee value.
Security and operating effort.

03

## Expand

More teams.
More qualified capabilities.

# Make AI a company capability.

The approved path from employee intent
to governed AI work.

---

Seeking pre-seed partners to turn this vision
into a repeatable enterprise product.
